I'm an engineer from Moscow 🇷🇺 with 7+ years of experience.

My main languages are Python, JavaScript and Go, and i specialize in backend developping and microservices, also in a web projects.

In recent years i develop, maintain and integrate a big production projects for network and telecom operators.

I also expanded my skills to include team leadership, as I believe that good communication and collaboration are key to successful projects.

I value simplicity in projects i develop. I honestly believe that all big successful systems have always been built from a simple foundation through evolution.

My buzzwords

My experience
